SUMMARY

Backend and cloud-focused developer with a versatile skillset and hands-on experience building scalable solutions. I combine technical adaptability with a focus on clean, well-architected systems. Currently working as a Cloud/System architect intern at Accenture. I am finalizing my Computer Science degree at Sapienza while independently studying Data Analysis and Data Science. Beyond work, I channel my creativity into practical projects and abstract problem-solving, with a passion for mathematics (especially abstract algebra) and theoretical computer science.
